WINTER WONDERLAND

Regular Debris Removal: Take a few moments after a windy day to skim the surface of your pool. This will help prevent clogging the skimmer.

Maintain Water Levels: Heavy rainfall can make the water levels rise. Ensure the water is halfway up the skimmer to maintain proper circulation. If levels are too high, you can use a submersible pump to safely lower water level.

Inspect Pool Equipment: Wind and rain can cause debris to accumulate around and inside your pool equipment. Be sure to check for any damages caused by this, so we can assess and address any issues that may affect pool maintenance.

'Tis the season for wind and rain! During this time of year, we often experience heavy wind and rain. These weather changes can impact the overall cleanliness of your pool. Here are some tips and tricks to help you maintain your pool between services:

THANKSGIVING & CHRISTMAS VACATION

As we gather with loved ones and celebrate the joy of the season, we want to keep you informed about our holiday schedule!

Thanksgiving Break: Our team will be taking a well-deserved break from **November 23rd thru November 30th**, during this time we will *not be servicing any pools*.

Christmas Break: We will also be closed **December 21st thru December 28th** to allow our team to spend Christmas with their families. We will *not be servicing any pools during this time either*.

To ensure your pool is in top shape, we will be dedicating extra time to your pool the week before and the week after these breaks. Thank you for your understanding, and we will you a joyful holiday season!
